

## Paperbag Tree

materials:

paper bag – any size!

tissue paper

glue

plate, basket or piece of cardboard for a base

optional: scissors

process:

Step 1: Make the trunk. Open the paper bag so that it can stand by itself. Twist a few times near the bottom.

Step 2: Make the branches. Rip or cut from the top of the bag down to the twisted section two or three times. Twist each of the branches starting near the bottom. You can also rip smaller branches closer to the top.

Step 4: Add some leaves! Glue to your base and add scraps of tissue for leaves. Oranges, reds and browns look like Fall, or use shades of green for Summer. Try using a white bag and pink tissue to make cherry blossoms in Spring!
